

MERN Stack Internship Assignment

Objective

Design and develop a Task Management Web Application using the MERN stack (MongoDB, Express.js, React.js, Node.js).

Task Description

- 1 User registration and login
- 2 Create, update, delete, and view tasks
- 3 Mark tasks as completed or pending

Frontend Requirements (React.js)

- 1 Responsive UI with functional components and hooks
- 2 Pages: Login, Register, Dashboard
- 3 Task operations (Add, Edit, Delete, Toggle status)
- 4 Form validation and API integration

Backend Requirements (Node.js + Express.js)

- 1 RESTful APIs
- 2 Authentication using JWT
- 3 Protected routes using middleware

Database (MongoDB)

- 1 User Schema: name, email, password
- 2 Task Schema: title, description, status, userId

Deliverables

- 1 GitHub repository link
- 2 README with setup instructions
- 3 Screenshots or demo video

Expected Output

- 1 Fully functional application
- 2 Secure authentication
- 3 Smooth CRUD operations
- 4 Clean UI and structured code

Bonus

- 1 Search and filter
- 2 Pagination
- 3 Deployment

Evaluation Criteria

- 1 Code quality
- 2 UI/UX
- 3 Functionality
- 4 Error handling
- 5 Creativity
